JavaScript

- Control structures.
- (OOP) Object Oriented Programming.
- (DOM) Document Object Model.
- ECMAScript 6.
- Local Storage.

Git & GitHub

Languages

- Spanish (native).
- English.

About me

My name is Nelson Rojas, I'm outgoing, kind, empathetic, and persevering.

In 2021 May, I started to study web development for myself in a disciplined form, where I set up a roadmap focusing on the front-end side, in which I'm still getting progress every day, studying and practicing all learned through different kinds of projects.

Experience

Budget App, HTML, CSS & JavaScript.

Budget App is an application web where you can write your deposits and your expenses, the app will calculate both of them to show the total balance, and the percentage of the expenses of the total deposited.

Web: <https://nrdevpy.github.io/budget-app/>

Arcane Survey Form, HTML & CSS.

This project was created with the purpose of gather information about what spectators think about the most popular video games series.

Web: <https://nrdevpy.github.io/survey-form/>

More than 15 projects uploaded on GitHub.

Education

- **freeCodeCamp, JavaScript Algorithms and Data Structures** - In progress.
- **freeCodeCamp**, Responsive Web Design.
- **Udemy**, Front-End Web Developer course.
- **Udemy**, CSS course.
- **Udemy**, HTML course.
- Educación Secundaria Obligatoria (E.S.O).

Interests

Between some of my objectives, I'm interested to be a full stack web developer, therefore I intend to learn the MERN stack (MongoDB, Express JS, React JS, and Node JS), although I want to keep building a solid JavaScript knowledge, also I would like to learn SASS and Bootstrap on the front-end side, to accelerate web development in projects, and have a better organization of them.
